GELADI
GENUINE MATTRESSES

About us

We are Geladi, a company producing mattresses, raw materials and consumables for upholstery. We started in 2001, when we decided to become the leading supplier of raw materials and consumables for the furniture and upholstery industry. In 2005, we launched our first machine for producing elastic cores used in sofa manufacturing, and in 2007, we established our first production facility. Since then, our range of products has been continuously expanding with high-quality options.

2009 was the year in which we wanted to take comfort to a higher level and we inaugurated our own mattress factory.

We offer a wide variety of orthopaedic mattresses, both pocket-spring mattresses and foam mattresses.

In addition to standard models, you can customize your mattress as you wish, depending on the materials, shape or size you choose.

Our mission is to look for the true comfort so that we can offer it to our customers. For the last 20 years, we have been constantly learning and investing in technology in order to offer products that meet the high quality standards.

Geladi's products include mattresses, polyurethane, elastic cores, wood derivatives products, ecological leather, fabrics and upholstery accessories.

“Passion and perseverance are the engines of GELADI’s development. The most important goal of my managerial activity is performance.

With the support of my family and my team, achieving this goal is guaranteed!”

POPA GELU
General Director

At Geladi, quality, comfort and professionalism matter

We use high quality materials in order to create durable, easy-to-use, smartly designed upholstery products with a single purpose: to make the user's life easier

We have all the necessary explanations regarding the production technologies and the origin of the materials used, because we want to be able to meet all expectations and have a constant dialogue with those who need help.

In addition, we have our own transport fleet and an organized distribution network to ensure the delivery of Geladi products under optimal conditions. Our team of sales agents operates in nearly 30 counties across Romania and is prepared to offer guidance and support throughout every step of the acquisition process.

For 20 years, we are getting better and better

The values underlying our daily activities are quality, expertise and innovation. We make no compromises and we are constantly setting ourselves to be better than we were yesterday, and our customers are confirming that we are succeeding. Organizational culture is important to us. We have a team of 100 people who work to make things happen at Geladi, most of whom have been here since the start of our company. They are serious and willing to participate in production, sales and distribution and help us to provide the good quality to our customers.

On the occasion of the 20th anniversary of our company, we launched a collection of exceptional mattresses, designed to provide comfort in use and a restful sleep. The top product in this collection is the Gold Edition Anniversary mattress. But we also have to note our latest foam mattresses. The catalogue offers a wide range of products: from mattresses for the improvement of sleeping place, to elastic cores ideal for upholstered furniture, to a wide range of accessories for upholstery: from fabrics and ecological leather, to mattresses and metal items specific to upholstered furniture.

Discover Geladi products with everything you need in your upholstery workshop.

This catalogue contains only some of the products we offer. For other products or more information, please contact us at the phone number on the last page, according to your geographical area.

LUXURY THERMO COOLER

The excellent partnership between GELADI and one of the world's most renowned textile manufacturers has led to the development of a new mattress called LUXURY THERMO COOLER, designed to meet the needs of customers in all seasons, especially in the very hot season, but also in the cold season.

Differentiation from classic mattresses is made by the use of the latest generation textile cover materials, respectively COOLER - for the summer side, which offers a pleasant feeling of coolness, and WARMER - for the winter side, which absorbs moisture and generates an amount of additional heat.

Studies and research carried out by the manufacturer show that the temperature of the COOLER fabric can be 1.3 degrees lower than standard materials, which ensures a relaxing sleep in a high ambient temperature environment. Both COOLER and WARMER increase the quality of sleep and guarantee rest at a high level of comfort.

The toppers attached to the mattress represent the superior comfort layers and are made of the following materials: summer side - COOLER textile quilted with batting and natural cotton; winter side: WARMER textile quilted with batting and wool. Both sides are composed of Soft Touch elastic foam and a layer of Latex foam.

Latex has the predominant characteristics of a natural material, it is antistatic and antibacterial, has a mite-fighting effect and provides better protection during sleep.

LUXURY THERMO COOLER mattresses are made with Pocket-Spring technology (individually wrapped springs), an advantage that contributes substantially to maintaining the health of your body.

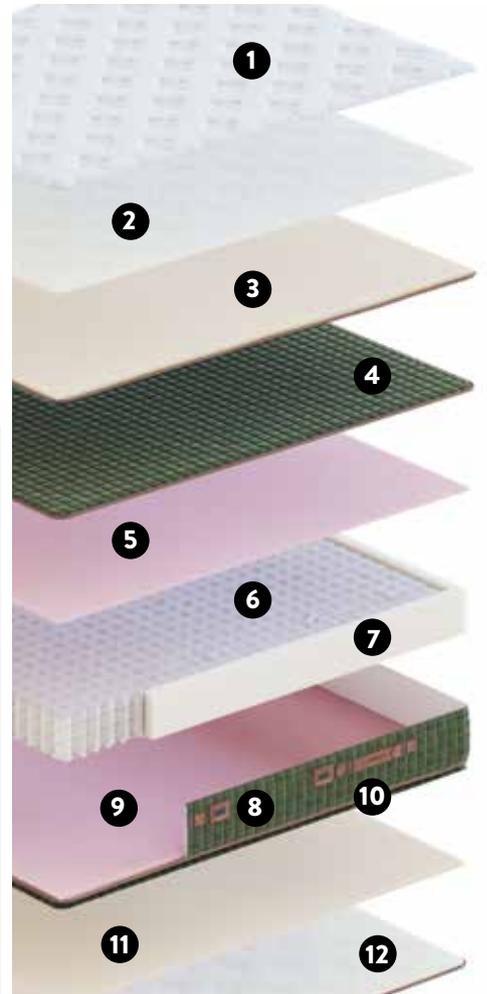

The mattress needs to be placed on a straight and continuous surface. Flexible mattress is only recommended if the distance between the slats does not exceed 5 cm.

Specifications

Sizes (cm)	190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 190×80, 190×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200, 200×80, 200×90		
Elastic core	springs made of "high carbon" steel wire individually wrapped in non-woven material.		
Toppers	Cooler & Warmer textile material quilted with wadding + cotton + wool and doubled with Soft Touch foam + TNT 40gr/m ² + Natural Latex (20%) with a thickness of 2.5 cm + soft quilted textile material.		
Layers	Soft quilted textile material + High Resilience foam board + pocket core + High Resilience foam board + soft quilted textile material		
Frame	polyurethane foam (High Resilience)		
Mattress cover	Quilted on the entire surface, doubled with non-woven fabric 15g/m ² . The textile used has an OEKO-TEX 100 ecological and health certification.		
Firmness	Medium	Weight	Approximately 19 kg/sqm
Height	39 cm (+/-1cm)	Recommended maximum weight	110 kg/person
Guarantee	5 years	Sides	summer, winter

This product can also be made to order, according to your specifications.

- 10** Double layer of soft material quilted with vatex
- 11** 2.5 cm thick layer of latex foam
- 12** WARMER textile material quilted with wadding and natural cotton

DENIM POCKET

We were motivated to build the “Denim Pocket” mattress by the impeccable and ageless demeanor that the mystical indigo blue exudes. This mattress is the epitome of a perfect balance between absolute comfort and charming looks. No matter where you live, keep living your life as you always have, full of sentimentality for the indelible memories you’ve collected throughout your life, just like living indigo.

Keep taking bold steps in the modern times like a traditional youth that is revitalized with each passing day while letting you be challenged by its alluring colors.

The topper attached to the mattress is the superior comfort layer and is made of fabric quilted with batting and natural cotton, backed with Soft Touch elastic foam and a generous layer of Latex foam.

Latex has the prevailing characteristics of a natural material, it is antistatic and antibacterial, has a mite-fighting effect, giving better protection during sleep. In the structure of the mattress we also incorporated a natural layer of coconut fibers, laminated with a latex film, which provides greater firmness but also permanent ventilation of the mattress, thus avoiding the formation of allergens.

Denim Pocket mattresses are made with Pocket-Spring technology (individually wrapped springs), an advantage that contributes substantially to maintaining the health of your body.

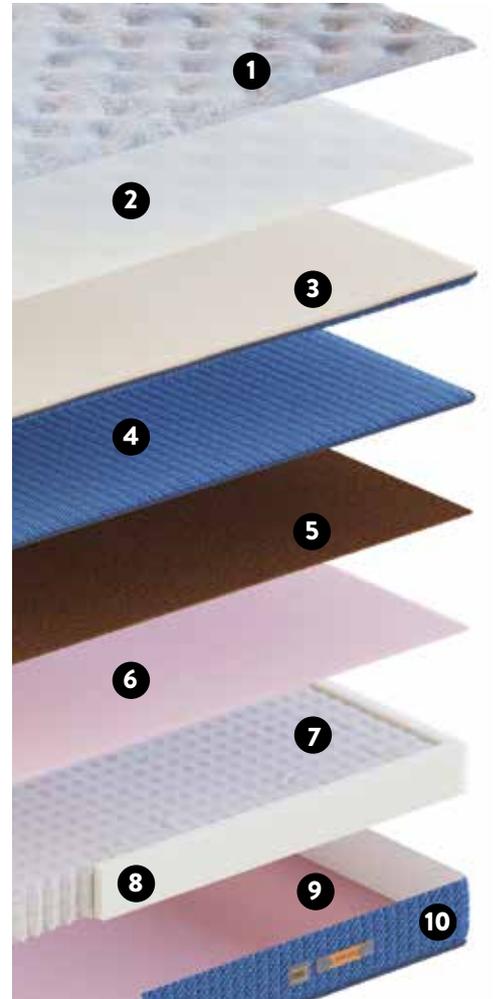

The mattress needs to be placed on a straight and continuous surface. Flexible mattress is only recommended if the distance between the slats does not exceed 5 cm.

Specifications

Sizes (cm)	190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 190×80, 190×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200, 200×80, 200×90

OCEAN'S DREAM

No matter what stage of life you're in, we welcome you to come and view our new mattress models, designed with a modern aesthetic that reflects our contemporary lifestyle and passion for comfort!

We at GELADI, aware of the destructive effects of plastic waste dumped in our planet's waters—a major environmental pollution issue—have decided to use a textile material made of 50% recycled polyester fibers for the OCEAN'S DREAM mattress. This initiative supports the conservation of natural resources and contributes to a cleaner aquatic ecosystem. The textile includes a special fiber obtained by recycling plastic waste, largely sourced from aquatic environments.

Leading manufacturers in the textile industry have crafted materials from this fiber for mattress covers that, beyond providing a comfortable and restful sleep, offer people the satisfaction of making a meaningful contribution to environmental protection. This fiber, more sustainable and environmentally friendly than virgin polyester, retains the same qualities as virgin fiber: elasticity, wear resistance, moisture absorption, and color durability.

Additionally, the recycled fiber is much more durable and environmentally friendly than virgin polyester fiber.

The OCEAN'S DREAM mattress is designed for dual-sided use, ideal for both summer and winter, providing the same level of comfort thanks to the integrated MEMORY SOFT TOUCH foam topper. Both sides are quilted with season-specific natural materials, such as cotton for the summer side and wool for the winter side.

The core of the OCEAN'S DREAM mattress is crafted using Pocket-Spring technology (individually wrapped springs), an advantage that significantly supports your body's health.

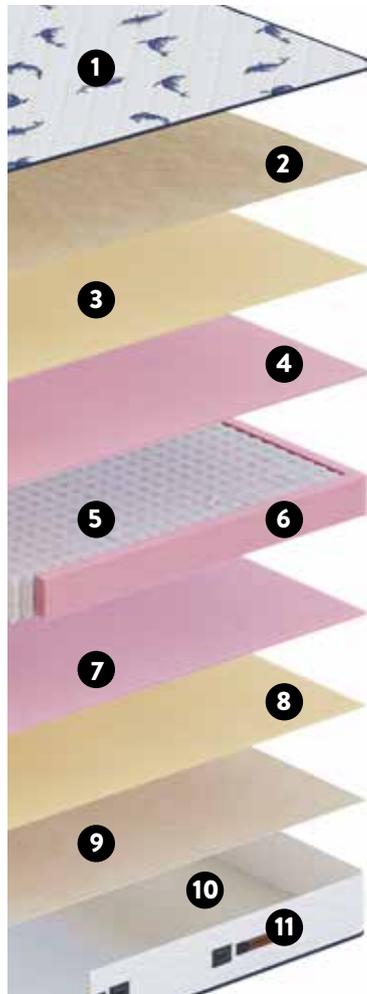

The mattress should be placed on a flat, continuous surface. We recommend a flexible bed base only if the distance between slats does not exceed 5 cm.

Specifications

Sizes (cm)	190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 190×80, 190×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200, 200×80, 200×90

- 5** 4 cm thick High Resilience polyurethane foam layer.
- 6** Side mattress cover made of natural quilted fabric with wadding + textile edge protection band and handles.
- 7** Textile material with a natural structure, quilted with premium siliconized wadding.

GOLD EDITION

20 years after the establishment of the company and after 11 years of work at the mattress manufacturing company GELADI, we, involved in production, sales and delivery, offer you an anniversary, extraordinary mattress, **GOLD EDITION ANNIVERSARY**.

The GELADI mattress manufacturing plant has been dedicated to enhancing sleep quality since its establishment in 2009, consistently promoting and advancing quality while offering good value for money. The GOLD EDITION mattress is configured as follows:

► 5 cm thick Memory/ Latex sheet, 2 cm High Resilience foam on each side of the mattress, and pocket-type springs core, together with high-quality cotton fabric, give all mattress users the feeling of a permanent 5-star holiday.

► both sides of the mattress can be used, due to its quilted cover with natural cotton layer (summer side) or wool layer (winter side).

The cover is thick, triple-quilted on comfort areas, ensuring a dry environment by preventing the body to get close to the foam core.

Unleash your imagination and come to us to offer you the comfort you need!

The mattress needs to be placed on a straight and continuous surface. Flexible mattress is only recommended if the distance between the slats does not exceed 5 cm.

PREMIUM POCKET

The new Premium Pocket mattress is covered with a mattress cover made of Silvercare material (silver fibre fabric).

After several years of experience in mattress production, we have developed the Premium Pocket mattress. This mattress combines pocket spring technology with elastic latex and High Resilience foam, covered by a double quilted Silvercare fabric mattress cover with wadding, cotton, and wool.

Our pocket spring mattress model is designed for all sleeping positions, providing the perfect resting environment and adequate support for your spine. The approximately 1,000 springs (available for a double mattress) ensure ideal comfort throughout your sleep.

The Premium Pocket mattresses feature Pocket-Spring technology (individually wrapped springs) that significantly supports your body's health. The Pocket system, combined with high-quality foams and harmoniously complemented by a mattress cover made from the finest materials, creates an exceptional mattress.

The mattress needs to be placed on a straight and continuous surface. Flexible mattress is only recommended if the distance between the slats does not exceed 5 cm.

- 9** Mattress cover made of quilted fabric doubled with Vatec and cotton on the winter side

RELAX POCKET

Relax Pocket mattresses are made with Pocket-Spring technology, which allows you to maintain the correct position of the body throughout the night.

Pocket Spring mattresses are also known as pocket mattresses or mattresses with individually wrapped springs. This design involves wrapping each spring of the mattress individually in soft fabric, in contrast to Bonell spring mattresses, where the springs are interconnected.

This allows each spring to adapt independently to the body's shapes, reducing pressure points. In this type of mattress, 90% of the pressure is applied to the specific area, while only 10% is transmitted to nearby areas, thanks to the pocket system.

RELAX mattresses are crafted using Pocket-Spring technology (individually wrapped springs), which significantly supports your body's health. This mattress is suitable for all seasons and can be used on both sides.

The individually wrapped spring system will transform a good sleep into an excellent one. The superior quality of this mattress is attributed to its soft and delicate fabric cover, as well as the generous layer of HIGH RESILIENCE foam. Because refreshing sleep is essential, the Relax Pocket mattress represents the definition of relaxation.

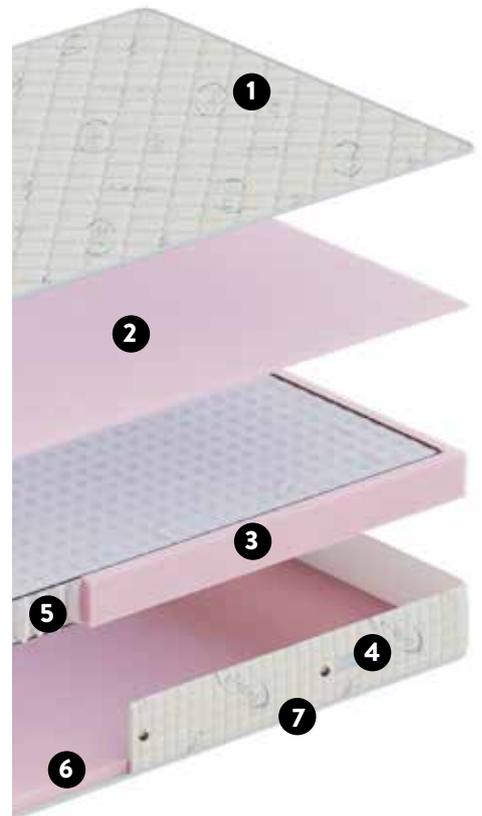

The mattress needs to be placed on a straight and continuous surface. Flexible mattress is only recommended if the distance between the slats does not exceed 5 cm.

Specifications

Sizes (cm)	190×80, 190×90, 190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 200×80, 200×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200

CLASSIC POCKET

CLASSIC POCKET mattresses are produced with Pocket-Spring technology, allowing you to enjoy a mattress that perfectly adapts to the needs of each individual, regardless of their sleeping position.

Pocket Spring mattresses, also known as pocket mattresses or mattresses with individually wrapped springs, feature springs that are each wrapped in soft non-woven fabric, unlike Bonell spring mattresses, where the springs are interconnected.

The CLASSIC mattresses are designed with Pocket-Spring technology (individually wrapped springs), which significantly supports your body's health. This mattress is suitable for all seasons and can be used on both sides.

The individually wrapped spring system accommodates the weight of each person, eliminating discomfort caused by a partner's movements during sleep.

Ensure that your home bedroom offers all the comfort you need by integrating a CLASSIC POCKET mattress into your bed.

- 8** 2 cm layer of polyurethane foam

LUX MEMORY

LUX MEMORY mattress is our latest model, which is 100% configured and created in our factory.

Thanks to the defined stability between the components and the harmonious interaction between them, in addition to ensuring the correct support of the spine during sleep, LUX MEMORY mattresses also provide an ideal sleeping surface.

The existence of the 3 cm thick Memory board, the 3 cm High Resilience foam on both sides of the mattress and the Bonell type springs in the middle allow you to absorb the pressure of your body and distribute it evenly over the entire surface of the mattress.

Both sides of the mattress can be used, and the mattress cover is made of quilted natural cotton (on the summer side)

and wool (on the winter side). The mattress cover is treated against bacteria, mites and allergens

Its anatomical function has the role to ensure complete relaxation of your muscles for good blood circulation. A third role that this mattress accomplishes is an ergonomic role that provides increased comfort during sleep.

It is mandatory to use the following types of spring boxes:

Specifications

- 10** 3 cm thick layer of High Resilience polyurethane foam.
- 11** 3 cm thick layer of Memory polyurethane foam.
- 12** Mattress cover made of quilted fabric, lined with Vatex and wool on the winter side.

HARD MED

A very special mattress.

HARD MED has been developed after several years of testing and direct consultations with customers who have experienced back issues. Choosing the right mattress is crucial as it plays an essential role in ensuring a restful and comfortable sleep.

Sleeping on an unsuitable mattress can cause or exacerbate back pain; a mattress that does not provide adequate support puts pressure on the back muscles and fails to keep the spine aligned.

Spring mattresses have several characteristics: they deform less easily, support greater weight, naturally ventilate better, and, not to be overlooked, they have greater durability.

The HARD MED mattress offers a firm surface, thanks to the polyurethane ribs located between the rows of springs, while also being very comfortable due to the High Resilience foam.

The mattress cover is made from a soft and delicate fabric, quilted with wadding and 300 g/sqm cotton on the summer side, and wadding plus 300 g/sqm wool on the winter side.

It is mandatory to use the following types of spring boxes:

PREMIER PLUS

Our best-selling mattress models are those with Bonnell springs, which continue to top the preferences of people with traditional tastes who are not ready to try sleeping on foam or independent spring mattresses.

People who prefer firm support and have a weight above average will always see the Bonnell spring mattress as their first option. Spring mattresses have several distinct features: they are less prone to deformation, support greater weight, naturally ventilate better, and, importantly, have greater durability.

Durability and comfort are key in describing the Premier Plus mattress, which combines steel springs with high-density polyurethane foam, as well as a quilted cover with layers of natural cotton and wool.

It is mandatory to use the following types of spring boxes:

Specifications

MEMORY FOAM

Memory Foam mattress is a product that combines the qualities of High Resilience material with memory foam, offering good balance between flexibility and rigidity, thus ensuring a correct and natural support during sleep.

The 5 cm layer of Memory Foam together with the quilted, natural cotton mattress cover ensures good temperature for the body, thus helping to stress relieving. Nothing is more pleasant than your own bed that preserves your position while you sleep. Memory Foam mattress shapes your body for the comfort and support of your dreams.

At the same time, the ability to self-ventilate and self-regulate humidity offers you the opportunity to benefit from a quality sleep both in the summer and in the winter.

The mattress cover is made of fine, soft material, treated with Aloe Vera, quilted with soft batting and 400 g/ m² cotton on the sleeping surface. Treatment with Aloe Vera has several benefits on the body due to their biological content (vitamins, minerals, amino acids etc.), has a positive effect on the skin, maintains a bioenergetic balance, thus ensuring a restful sleep.

Spring boxes recommended:

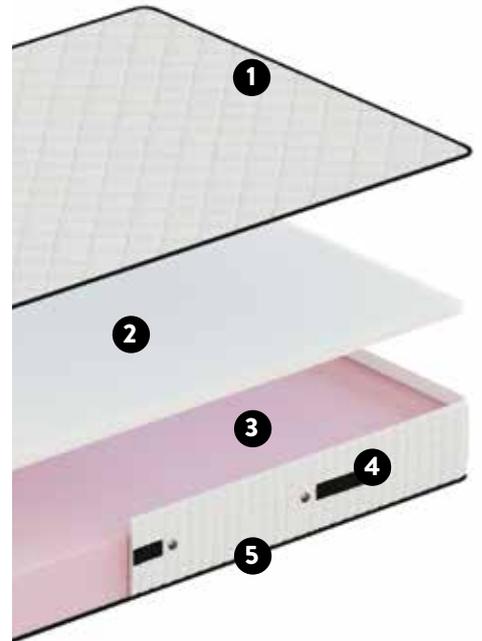

The memory surface can be used in any season.

SALAMANDER MEMORY FOAM

The ancients believed that salamanders could live in fire, becoming a symbol of those who maintain their inner peace in the face of everyday problems. Fascinated by this legend, we chose to offer you a custom textile featuring the image of a salamander, designed to bring you the most peaceful and restorative sleep. The image of the salamander is not just a simple design but a symbol of resilience to stress and inner calm.

This textile was created to provide you with a comfortable mattress and inspire you to face each day with a positive and determined attitude. The Salamander Memory Foam mattress combines the qualities of a premium cover, high firmness foam, High Resilience RIFLAT foam, and a Memory Foam layer, offering an optimal balance between elasticity and rigidity. This ensures a correct and natural position throughout your sleep.

The top layer of Memory Foam, along with the quilted cover made from natural cotton, maintains an optimal body temperature, helping to relieve tension in the body. This layer conforms to your body, allowing you to enjoy quality sleep both in summer and winter.

The mattress is made from certified foam that contains no harmful substances and is safe for all users (including children). The mattress cover is made from a soft and delicate, skin-friendly fabric, personalized and quilted with natural cotton weighing 300-350 g/sqm in the sleeping area.

Spring boxes recommended:

The memory surface can be used in any season.

Geladi Mattresses

LATEX

Natural Latex is made from the sap of the rubber tree. Due to the presence of intercommunicating air cells, the latex foam provides an upper internal ventilation, thermal stability and its flexibility, allows full adaptation to the body during sleep.

These features of LATEX mattress give it anatomical properties with orthopaedic functions and a high level of comfort.

t

For a healthy sleep, the 3 comfort zones support and evenly distribute body pressure on the mattress surface. Due to its chemical composition, latex prevents the growth of bacteria, mould and mites.

Latex mattresses that contain 20% natural latex will give you a healthy sleep thanks to the natural elasticity of the material that keeps your spine in the right position.

Not only will your sleep be restful, but your body will also be calmed down, as latex allows the mattress to self-ventilate and self-regulate moisture.

Spring boxes recommended:

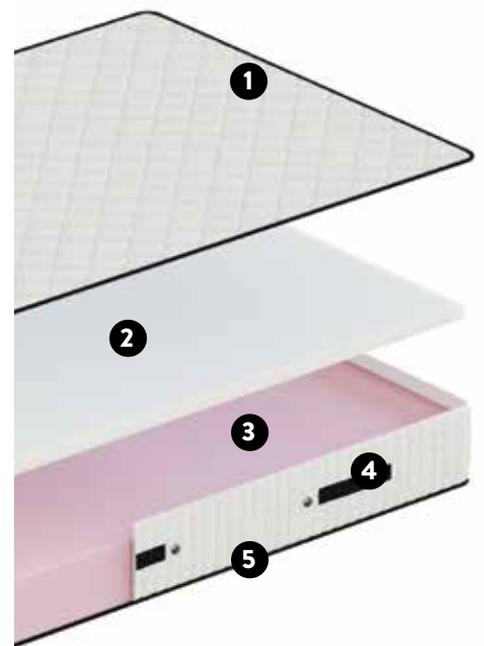

The latex surface can be used in any season.

Specifications

SALAMANDER LATEX

Fascinated by the unique abilities of the salamander, such as self-regeneration and self-healing, we have developed this mattress called Salamander Latex. It is covered with a mattress cover made of high-quality knitted textile, customized with the image of a salamander seeking shelter, with the intention of guiding you into another world where your body can regenerate and heal itself, solely through the power of thought.

This material has been created to provide you with a comfortable mattress that induces a state of relaxation and safety, helping you greet each day with a positive and determined attitude. The Salamander Latex mattress combines the qualities of a premium cover, high firmness foam, ribbed High Resilience foam, and a latex layer, offering an optimal combination of elasticity and rigidity. Designed this way, it ensures a correct and natural position throughout your sleep.

Natural latex is obtained from the sap of the rubber tree. Due to the presence of intercommunicating micro air cells, latex foam allows for superior internal ventilation and thermal stability. The elasticity of latex enables effective conforming to the body during sleep, giving the mattress anatomical properties, orthopedic functions, and a high level of comfort.

The three comfort zones support and evenly distribute the pressure of the body across the surface of the mattress, ensuring a healthy sleep. Due to its chemical structure, latex does not allow the development of bacteria, mold, or dust mites, making it a product successfully used in multiple medical applications.

The latex mattresses made by GELADI contain 20% natural latex, which ensures not only a restful sleep but also a healthy resting environment, as latex allows the mattress to self-ventilate and self-regulate its moisture. This creates an almost perfect similarity between the self-healing ability of the salamander and the self-maintenance capacity of latex.

The mattress cover is made from a soft and delicate fabric, quilted with 300-350 g/sqm cotton on the sleeping surface, providing added comfort and protection.

Spring boxes recommended:

The latex surface can be used in any season.

SMART HYDROGEL

The **SMART HYDROGEL** mattress represents the pinnacle of modern technology applied in the production of ultra-comfortable mattresses, resulting from the combination of natural fibers and cutting-edge silicone gel inserts, providing a memorable experience and deep, restful sleep.

The knitted textile material that makes up the mattress cover, containing aloe vera hydrogel and natural fibers, is designed to ensure the body's moisture balance. This balance is essential for maximizing rest and creating an optimal sleep environment, achieved through a perfect balance of warmth, coolness, and humidity.

Widely used in the cosmetic industry, Aloe Vera is found in the cover's structure in the form of natural gel, actively contributing to maintaining skin moisture throughout the night.

Incorporating special polymers derived from natural beech and birch fibers that activate the gel content, the cover of this mattress provides remarkable cooling effects and creates an extraordinary environment for a pleasant and refreshing sleep.

In addition to the three layers of premium foams, the SMART HYDROGEL mattresses also feature a self-molding, cushioning silicone gel layer positioned directly under the mattress cover. The Smartgel is a 3D insert that self-shapes, is thermoregulating, soft to the touch, solid yet fluid, completely non-toxic, and poses no risk of skin irritation. This gel insert was developed for medical purposes, and its unique properties in reducing pressure points provide a significant advantage and exceptional comfort.

The mattress cover, soft and delicate, is made from knitted textile material and is quilted with 300-350 g/sqm cotton on the sleeping surface, offering added comfort and protection.

Spring boxes recommended:

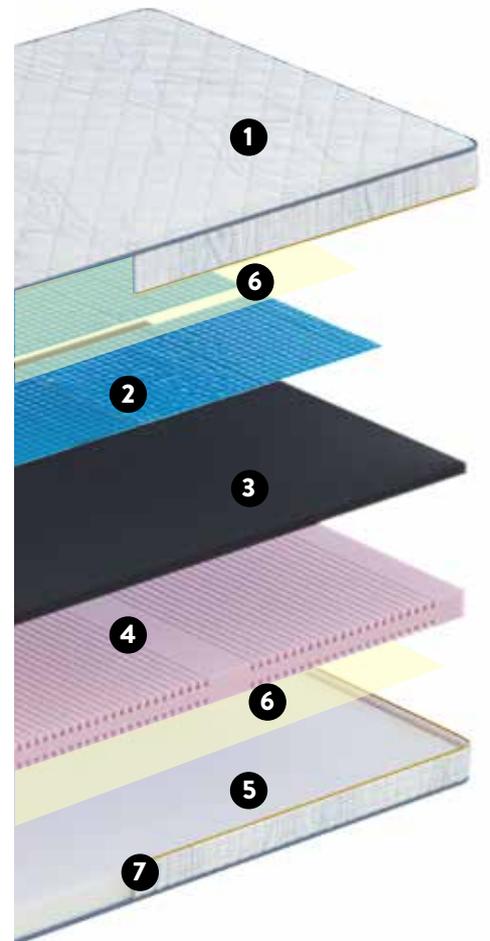

The latex surface can be used in any season.

Structure	Foam with high density and firmness, ribbed polyurethane foam (High Resilience), foam with high density and firmness, gel layer.		
Mattress cover	Detachable, quilted with natural cotton on the sleeping side and doubled with 40 g/sqm non-woven fabric + elastic non-woven fabric for core protection. The textile material used is eco-certified and complies with the OEKO-TEX 100 standard.		
Recommended maximum weight	120 kg/person	Firmness	Medium (the level of firmness is compared to other Geladi mattresses).
Height	29 cm (+/-1cm)	Guarantee	5 years
Handles:	for transport	Weight	~12 kg/sqm

This product can also be made to order, according to your specifications.

SMART HYDROGEL

- 1** Custom textile material quilted with a layer of natural cotton and a layer of siliconized wadding.
- 2** Layer of gel foam with high density and elasticity.
- 3** Layer of black foam with high density and firmness.
- 4** Layer of ribbed High Resilience foam.
- 5** Support foam layer with high density and firmness.
- 6** Elastic non-woven fabric for core protection.
- 7** Side mattress cover with zipper, externally quilted with wadding, detachable + textile band for edge protection.

OZONE THERAPY

Revolutionize Your Sleep with Ozone Therapy Technology.

The ozone mattress is a cutting-edge technological innovation designed to improve sleep quality by reducing the negative effects of free radicals and oxidative stress. This advanced technology utilizes fabrics that incorporate spirulina from marine waters and naturally crystallized minerals, providing a healthy and revitalizing sleep. The mineral crystals present in the fabric structure generate certain active ions in the presence of the human body temperature, positively affecting health, similar to the principles of ozone therapy. By combining crystallized minerals and spirulina, this innovative mattress offers protection against oxidative stress and free radicals, ensuring a restorative and deep sleep.

The Ozone Therapy mattress can be viewed as a beneficial investment for your health and comfort, reinforced with a guarantee for superior sleep quality! The OZONE THERAPY mattresses contain two layers of high-density and firmness foam, a LABYRINTH insert, and a premium XDURA foam layer. LABYRINTH is a revolutionary and unique material used exclusively in the mattress industry, possessing extraordinary properties that cannot be matched by ordinary filling materials. Its ventilated 3D multifilament structure allows moisture to be rapidly removed due to excellent ventilation.

The advantage of the Labyrinth insert is that at the end of the mattress's lifespan, this material can be reused through conventional plastic recycling processes. The Labyrinth material has a high density of approximately 60 kg/m³, is made from a single polymer, which makes it fully circular, elastic, comfortable, and recyclable, making it the perfect fit for the elastic core inside the mattress.

XDURA foam is an advanced material used in the mattress industry for superior comfort and durability. It is a high-performance polyurethane foam developed to provide an ideal combination of comfort, support, and long-term durability.

The mattress cover is made from a soft and delicate fabric, quilted with premium wadding and 300-350 g/sqm cotton on the sleeping surface, providing added comfort and protection.

Spring boxes recommended:

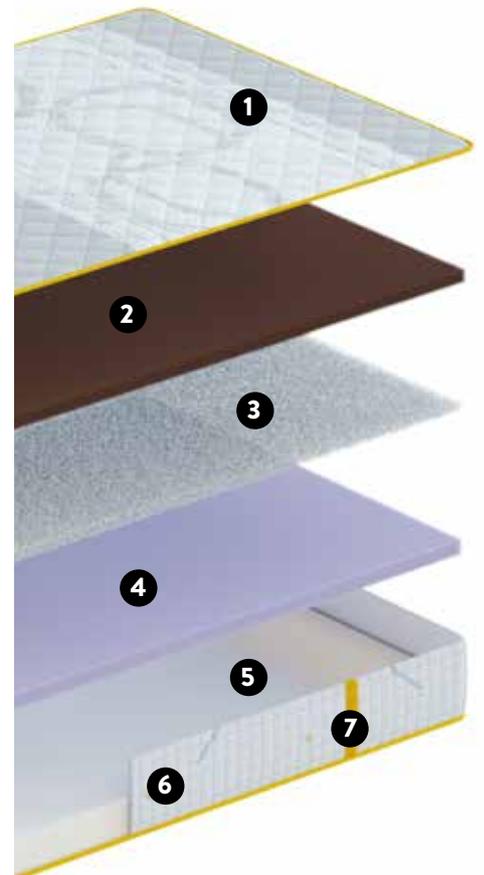

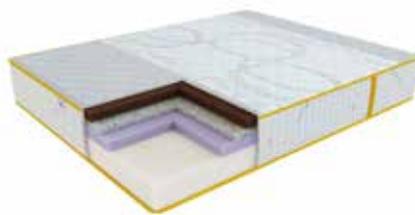

The latex surface can be used in any season.

Specifications

Sizes (cm)	190×80, 190×90, 190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 200×80, 200×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200

- 1** Custom textile material quilted with a layer of natural cotton.
- 2** Layer of XDURA foam with high density and elasticity.
- 3** Layer of LABYRINTH with high firmness and elasticity.
- 4** Layer of purple foam with high density and firmness.
- 5** Support foam layer with high density and firmness.
- 6** Side mattress cover, externally quilted with wadding + textile band for edge protection.
- 7** Handles: customized and ventilation buttons.

MEMORY EKO SOFT

MEMORY EKO mattress is designed to offer the balance between the degree of elasticity of the memory foam and the rigidity of the supporting foam, thus giving an anatomical support to the body and a correct position of the spine without back pain during sleep.

Both foams are made to the high quality standards, guaranteeing a safe and healthy product that evenly distributes body weight over the surface of the mattress, eliminating pressure points during sleep to allow muscles to relax and to ensure proper blood circulation.

The mattress is fully quilted with a soft batting layer and the fabric is antibacterial and OEKO-TEX 100 certified.

Spring boxes recommended:

The memory surface can be used in any season.

Specifications

- 5** Mattress cover made of quilted fabric doubled with Vatex

BABY AIR MATS

We are excited to present our new BABY AIR MATS mattress from our series production: a mattress with fabric treated with PROPOLIS and a revolutionary AIR MATS structure, fully washable. This mattress combines innovation with nature to provide an optimal resting environment for babies, essential in the first months of life.

The fabric treated with Propolis, a natural product obtained by bees from resins collected from buds and plant secretions, has been specifically created to support the baby's immune system. Propolis, known for its antibacterial, antimicrobial, and antifungal properties, helps improve the environment in which the baby sleeps. Additionally, the textile of the mattress contains vitamins C and E, as well as ginger, a blend with antioxidant effects that protects and nourishes the delicate skin of babies.

The BABY AIR MATS mattress is designed with high firmness, ideal for correctly supporting the baby's spine and maintaining good blood circulation. The AIR MATS layer is an innovative material, unique in the mattress industry, that offers a series of extraordinary advantages over traditional filling materials.

Its 3D multifilament structure, resembling "spaghetti" made of open fibers, ensures optimal air circulation and rapid moisture removal, thus preventing the emergence of unfavorable environmental conditions that could disturb the baby and affect their long-term health. Additionally, AIR MATS is a recyclable material made from a single polymer, making it elastic, comfortable, and durable.

The mattress cover is detachable and washable at 30 degrees, quilted with a natural cotton layer of 300-350 g/sqm for enhanced comfort.

Moreover, the cover is treated against bacteria, dust mites, and allergens, ensuring a clean and safe environment for babies' sleep. The BABY AIR MATS mattress not only provides optimal sleep support but also significantly contributes to the overall health of the baby by creating a safe, clean, and comfortable environment.

Spring boxes recommended:

Specifications

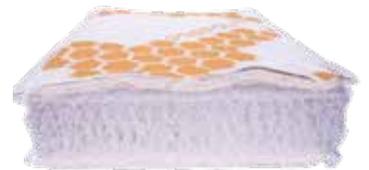

Sizes (cm)	120x60
Elastic core	Washable AIR MATS layer.

① The level of firmness is compared to other Geladi mattresses.	

This product can also be made to order, according to your specifications.

BABY AIR MATS

- 1 Mattress cover made of custom premium fabric, quilted with a layer of natural cotton, detachable with a zipper, washable at 30 degrees.
- 2 AIR MATS labyrinth layer with medium density and firmness, washable under running water.

The innovative mattress that allows for washing both the cover and the core. // // //

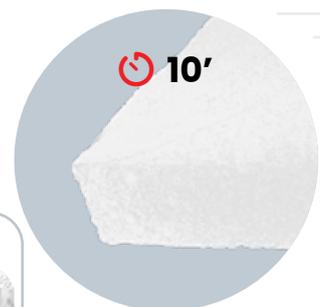

1 Easy removal of the detachable cover.

2 Washing the core under running water. And washing the cover in the washing machine.

3 Dries quickly. Our innovative mattress dries quickly after washing due to unique features that allow air and water to circulate freely through its structure.

BABY DREAM

The most suitable mattresses for baby's sleep are those with high firmness, with natural products such as coconut fibres, wool, cotton and a high density polyurethane foam (High Resilience) to increase the comfort and quality of sleep.

One of the causes in the restlessness of babies is the place (area) where they spend most of their time in the first months of life: their crib. If the area is not well ventilated and clean, the baby becomes restless and unable to rest. This can have effects on your baby's health over time.

BABY DREAM mattress ensures optimal conditions for sleep, but at the same time it plays a very important role on the body, contributing to a healthy spine and good blood circulation. The mattress cover is treated against bacteria, dust mites and allergies.

Spring boxes recommended:

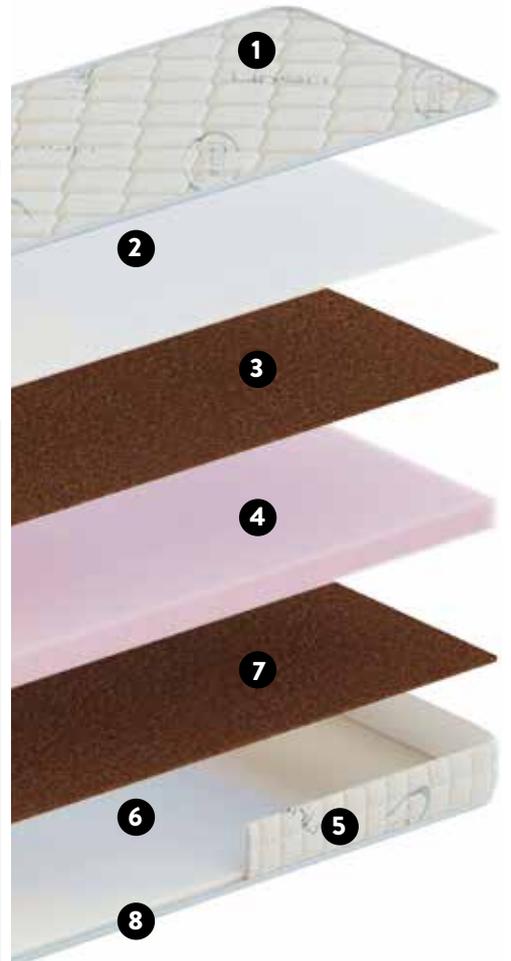

Specifications

Topper Geladi

MEMORY FOAM

The mattress topper for Memory Foam mattress was specially created to improve the sleeping areas. Memory Foam structure provides extra comfort for very firm mattresses and sofas and reduces the discomfort caused by the joints of these surfaces.

Thanks to the 5 cm memory foam, the Memory Topper provides a high level of comfort that evenly distributes the weight of the body, creating a healthy and comfortable environment for sleeping.

Removable cover with zipper allows it to be washed at 40 degrees, ensuring a constant feeling of freshness and cleanliness. This topper can be used on both sides, in any season, on any type of sofa or mattress or during camping.

Spring boxes recommended:

Specifications

Sizes (cm) 190×80, 190×90, 190×100, 190×120, 190×130, 190×140, 190×160, 190×180, 200×80, 200×90, 200×100, 200×120, 200×130, 200×140, 200×160, 200×180, 200×200

Structure 5 cm Memory foam and a density of 50/16 kg/m³

Mattress cover Removable, doubled with elastic non-woven fabric (40 g/m²) for foam protection. The textile material used has an OEKO-TEX 100 ecological and health certification

Recommended maximum weight 120 kg/person

Firmness soft

Height 5 cm (+/-1cm)

Guarantee 3 years

Weight 2,5 kg/sqm

This product can also be made to order, according to your specifications.

Topper Geladi
LATEX

The topper made of Latex was specially designed to improve the sleeping areas. The Latex foam structure provides an extra comfort layer for very firm mattresses or sofas and reduces the discomfort caused by the joints of these surfaces.

The flexibility of the natural latex in its composition provides extreme comfort, especially when in contact with hard surfaces. Its cellular structure allows an efficient air circulation, ensuring the pleasure of a restful sleep.

Removable cover with zipper allows it to be washed at 40 degrees, ensuring a constant feeling of freshness and cleanliness. This topper can be used on both sides, in any season, on any type of sofa or mattress or during camping.

Spring boxes recommended:

Specifications

LOUNGE MATTRESS

Sponge mattresses for loungers can become your body's friends and can give you the long-awaited rest on the terrace of your home or on a comfortable sun lounger on the beach.

Maximum comfort in your personal space (exterior or interior) can also be given by sponge mattresses for canopy, sunbed mattresses or pallet mattresses.

The advantages of our mattresses can be: comfort, diversity (we make any size and model based on a project or sketch), removable and washable covers, waterpr

We use medium density sponges for standard products but, upon request, we can make products with Memory Foam, fireproof foam or other densities. The foams used are manufactured to the high quality standards, which guarantees a safe and healthy product.

Spring boxes recommended:

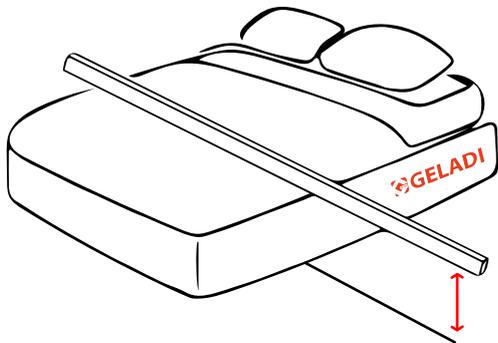

Sizes (cm)	190x80
Structure	4 cm polyurethane foam
Mattress cover	Detachable with zipper and waterproof, the textile material used has ecological and health certification
Guarantee	2 years

Height	4 cm (+/-1cm)
Firmness	soft
Maximum recommended weight	100 kg/person
Weight	1,5 kg/sqm

**This product can also be made to order, according to your specifications.*

MATTRESS MEASUREMENT GUIDE

Height

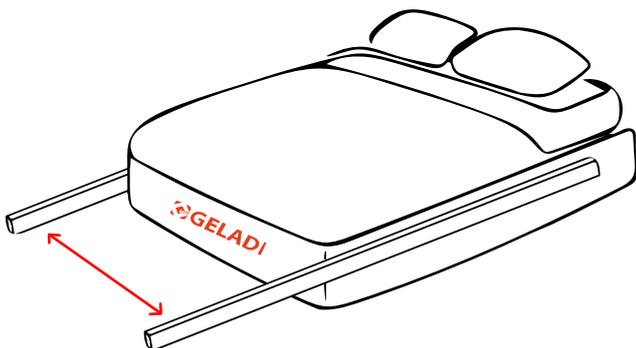

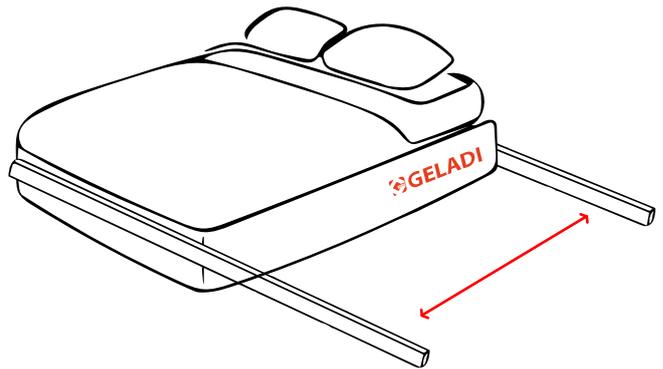

To find the correct height of a mattress, follow the tips below:

- ✓ Position the mattress on a flat, firm surface.
- ✓ Place a ruler or a long, rigid object on the mattress that reaches the midpoint of the mattress.
- ✓ Measure the distance from the flat surface on which the mattress is placed to the ruler on the mattress. The result represents the height of the mattress.

Length

To determine the correct length of a mattress, you should follow these tips:

- ✓ Position two rigid, firm rulers along the sides of the mattress so that they reach the midpoint of the mattress.
- ✓ Measure the distance between the two rulers with a tape measure, and you will have the correct length of the mattress.

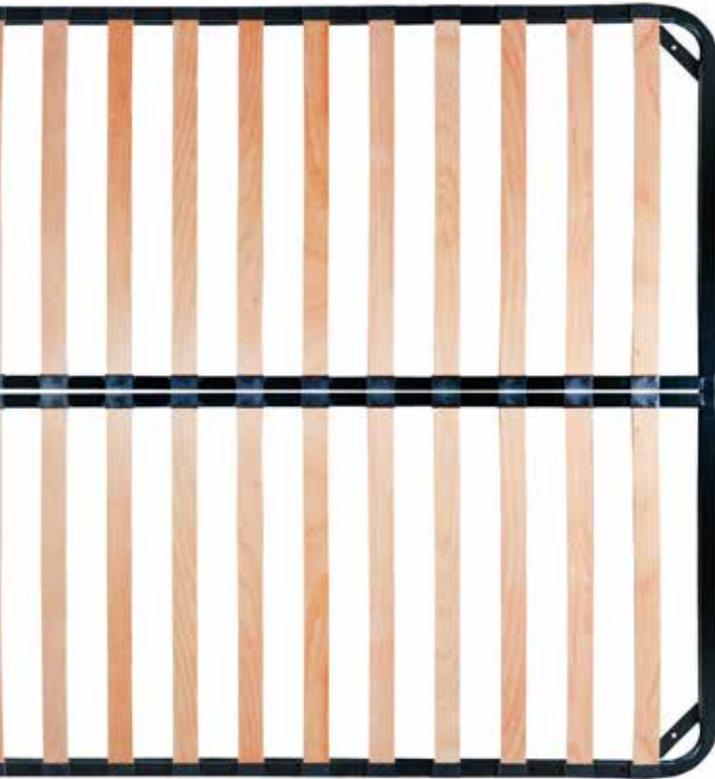

Width

To determine the correct width of a mattress, you should follow these tips:

- ✓ Position two rigid, firm rulers along the sides of the mattress so that they reach the midpoint of the mattress.
- ✓ Measure the distance between the two rulers with a tape measure, and you will have the correct width of the mattress.

The materials used in the manufacture of mattresses may cause dimensional variations of +/- 2 cm.

SLATTED BED BASE

Slatted bed base Type 1

Usual dimensions:

190×100, 190×120, 190×140, 190×160, 190×180, 190×90,
200×80, 200×90, 200×100, 200×120, 200×140, 200×160, 200×180

5 cm wide slats, applied above the frame, the distance between the slats is 8 cm

This type of base can be delivered simple, with legs and with a folding system.

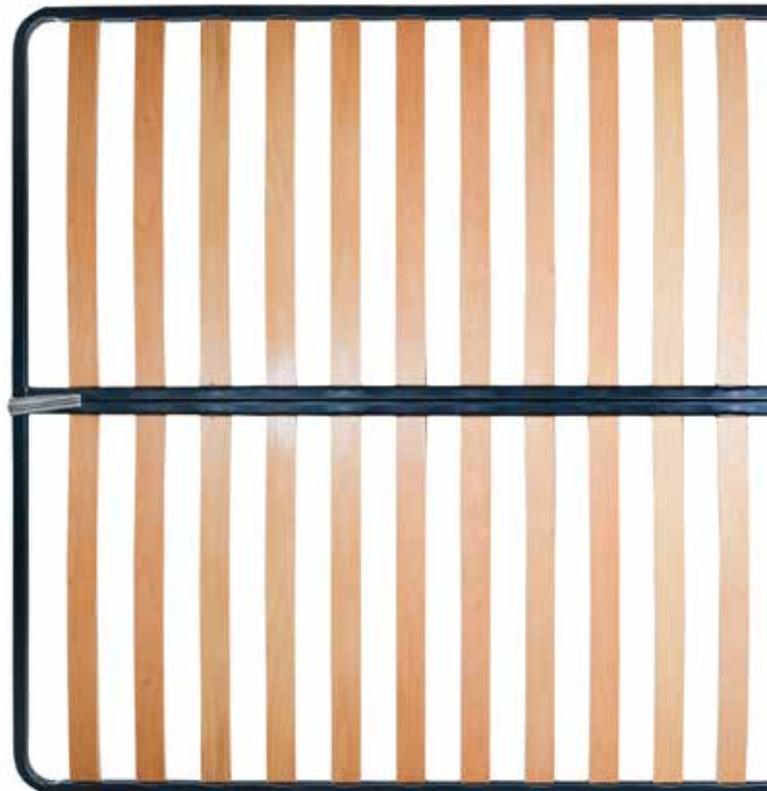

Slatted bed base Type 2

Usual dimensions:

190×100, 190×120, 190×140, 190×160, 190×180, 190×90,
200×80, 200×90, 200×100, 200×120, 200×140, 200×160, 200×180

This type of base can be ordered in atypical sizes and can be delivered simple, with legs and with a folding system.

7 cm wide slats, inserted in the frame, the distance between the slats is 8 cm

BONELL WIRE AND SPRINGS

Wire

When it comes to comfort, details matter. The wire used for the elastic cores is imported and is specially designed for the production of upholstery springs.

Wire diameter	Packing
⌀ 2,4	Bale 500 kg
⌀ 2,2	Bale 500 kg
⌀ 1,3	Bale 100kg or 300kg
⌀ 1,4	Bale 100kg or 300kg
⌀ 3,5	Bale 350kg or 500kg

Springs

Springs are an important element in the process of building a comfortable piece of furniture. Geladi springs are made of carbon steel wire and are heat treated at high frequency currents.

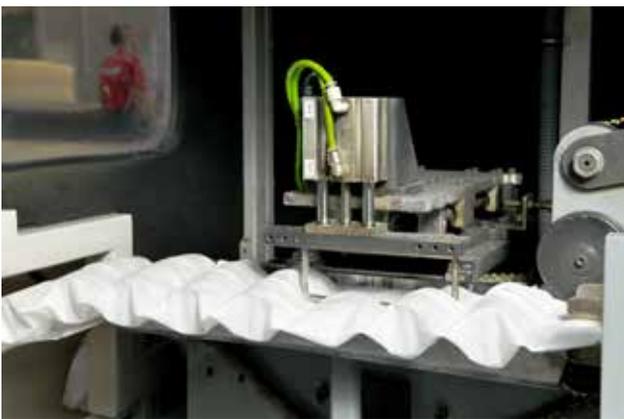

Spring Type	Spires	Spring height	Wire thickness	Spring ring diameter	Packing
Bonell type spring	4	75 mm	2,2 mm	73 mm	1000 kg/pallet
Bonell type spring	4	90 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	4	110 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	4	130 mm	2,2 mm	86 mm	1000 kg/pallet
Bonell type spring	4	130 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	5	145 mm	2,2 mm	92 mm	1000 kg/pallet

POCKET

The POCKET - SPRING system is a revolutionary system used in the manufacture of mattresses, but also of upholstered furniture.

Being a Geladi product, it is created with the help of the latest generation equipment that gives it a guarantee of quality.

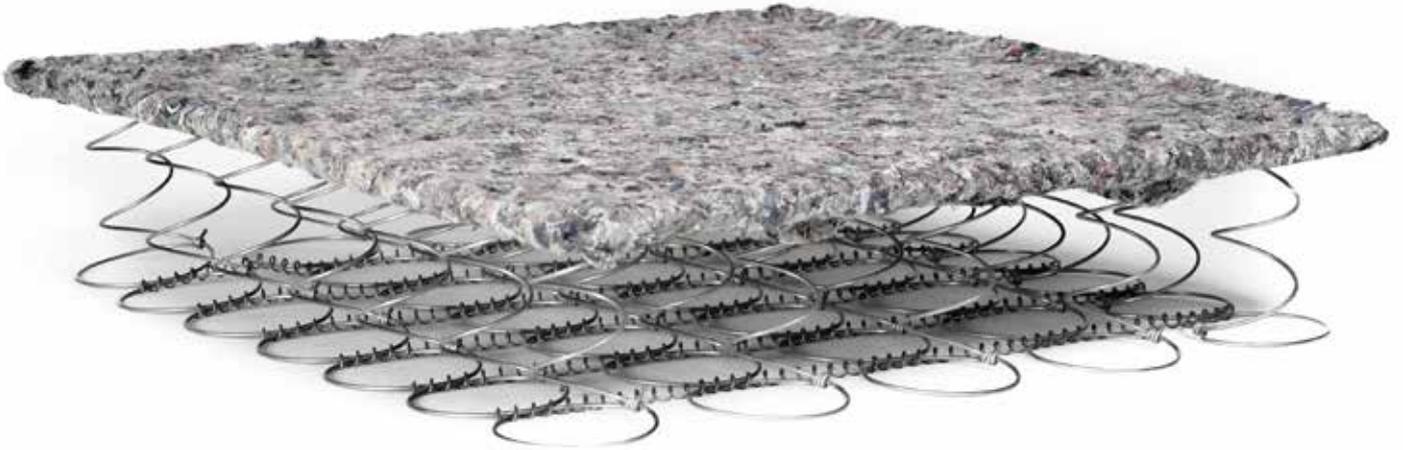

It is made of carbon steel springs with a wire diameter of 1.8 mm, height 150 mm, coated in TNT 70 g/m², which gives it a very high resistance over time.

Each spring is individually glued to this TNT, through ultra sounds, which allows it to take over some of the force exerted on it. Thanks to the manufacturing technology, but also to the 360 springs/m² with flat frame on each side of the elastic core, the POCKET - SPRING system offers the user a high comfort.

Spring Type	Spires	Spring height	Wire thickness	Spring ring diameter	Number of springs/m ²
Pocket type spring	5	150 mm	1,8 mm	50 mm	360 pcs

BONELL

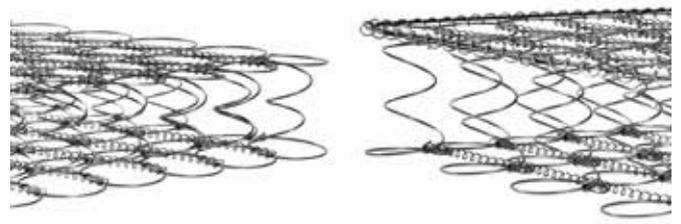

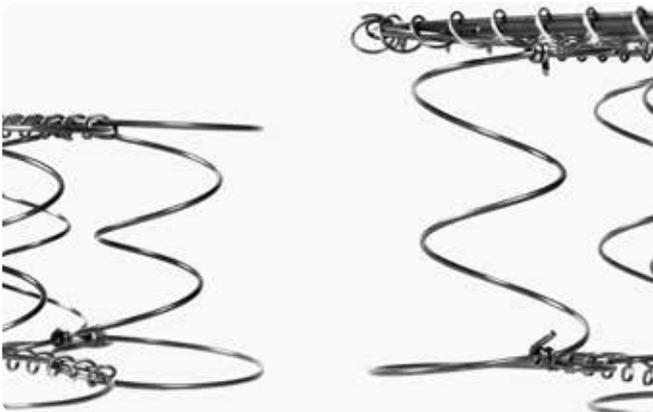

The BONELL SISTEM elastic core is made of high-frequency current-treated carbon-steel wire springs to provide good elasticity and superior strength over time.

This type of elastic core is ideal for making upholstered furniture and orthopaedic mattresses.

These can be:

- ▶ simple
- ▶ with wire frame Ø 3.5 - stapled
- ▶ coiled
- ▶ with felt
- ▶ with frame and felt

In standard format, the felt used is 800 g/m², but other weights can be used for special orders

Spring Type	Spires	Spring height	Wire thickness	Spring ring diameter	Packing
Bonell type spring	4	75 mm	2,2 mm	73 mm	1000 kg/pallet
Bonell type spring	4	90 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	4	110 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	4	130 mm	2,2 mm	86 mm	1000 kg/pallet
Bonell type spring	4	130 mm	2,4 mm	86 mm	1000 kg/pallet
Bonell type spring	5	145 mm	2,2 mm	92 mm	1000 kg/pallet
